

Appendix One: Index of Indicators in the 2005 and 2007 Reports

The following table shows the national and NSW indicators identified for measurement in the *Two Ways Together Report on Indicators 2005*. The table shows both the 2005 and 2007 report references. In some cases indicators are included under different topic groupings in the 2007 report and some topics and indicators have been added.

Some indicators are presented in tables and some, to better illustrate trends, in graphs or charts. The data from which tables and graphs are derived are available in spreadsheet format at daa.nsw.gov.au. All indicators in the report are numbered by chapter and topic. Within each topic, population indicators are listed alphabetically and performance or service indicators are listed numerically.
